Challenges

- The Juno requires customization to best benefit a user.
- The Menu can be harder to navigate without having the menus spoken aloud.

Orientation to Juno

1 Camera: Rotate for multiple purposes

2 Power: Short press to power on or put on standby, and long press to power down

3 & 4 Color mode: Move up or down through color modes

5 Capture: Press to capture or return to Live view

6 & 7 Magnification: Increase or decrease zoom level

8 LCD screen: Touch to select

Button Bar Menu

- Main Menu button top left corner of the screen, tap to open more options.

- Volume and Speech Rate button middle left of screen, tap to open the sliders that control how loud and fast Juno speaks.

- Restore button bar bottom left of screen, tap to restore and hide the button bar menu.

- Lights on button top right corner of the screen, tap to toggle lights off and on.

- Line & mask button middle right of screen, tap to display reading line and mask drag one finger to move line or mask boundary.

- Lock focus button bottom right, tap to turn on and off focus lock to use during writing or hobby tasks.

Menu Settings

- Spoken Menus
- Device voice
- Color themes
- Font size

User Settings

- Color modes
- Standby time
- Storage manager

System Settings

Tap the **System Settings** icon to display the **System Settings** screen, which has four options:

Time and Date

Default Save Types

Update Juno

Reset to Defaults

How to use System Settings

Time and Date

- Set the date and time that the system displays in the upper right corner. If the battery fully discharges, then you will need to reset the date and time.

Default Save Types

- Select the default file type used when capturing pictures and the default file type used when capturing text.

Update Juno

- Update Juno with the latest software and firmware. For any future updates download the latest Juno software onto a USB-C flash drive to update Juno. You can use the same flash drive to update multiple Juno devices.

Reset to Defaults

- Reset the device to the default values. All customized settings are lost, including the volume, speech rate, brightness level, and voice selection. However, the menu voice, date, and time are saved.
