Poll Question #2

Where is the About menu located?

- Settings

- User settings

- System settings

- Main menu

Check the Software Version Number

The most up-to-date software version for Juno is **2.0.36**. To check that your Juno has the most recent software version follow these steps:

1. Tap the RESTORE button bar icon ⟫ in the bottom left corner of the screen

2. Tap the MAIN MENU icon ☰

3. Tap the INFORMATION icon ⓘ

4. The About screen will show the Juno Version, OCR Version, and TTS Version as well as the Serial Number.

System Settings

Tap the **System Settings** icon to display the **System Settings** screen, which has four options:

Time and Date

Default Save Types

Update Juno

Reset to Defaults

How to use System Settings

Time and Date

- Set the date and time that the system displays in the upper right corner. If the battery fully discharges, then you will need to reset the date and time.

Default Save Types

- Select the default file type used when capturing pictures and the default file type used when capturing text.

Update Juno

- Update Juno with the latest software and firmware. You must download the latest Juno software onto a USB-C flash drive to perform this procedure. However, you can use the same flash drive to update multiple Juno devices.

Reset to Defaults

- Reset the device to the default values. All customized settings are lost, including the volume, speech rate, brightness level, and voice selection. However, the menu voice, date, and time are saved.

Battery Status

Standby

- Press the white Power button briefly to put Juno in standby mode. The screen darkens and the processor is put in a lower power state. After five minutes of inactivity, Juno automatically goes into standby mode. Press the Power button to wake up the device.

Standby Time

To adjust this setting:

- Tap the **Restore** button , then tap the **Main Menu** button .

- Tap the **Settings** icon to display the **Settings Menu.**

- Tap the **User Settings** icon to display the **User Settings** screen.

- Tap the **Standby Time** icon to display the **Standby Time** screen.

- Swipe up or down and select the number of minutes that you want the system to remain idle before going into standby mode. The default is **5 minutes**.
